

How to run the automation Project

Step 1: download the node and install (<https://nodejs.org/en/download>)

Step 2: restart the machine

Step 3: Install the cypress and allure report:

In the terminal type

```
npm install cypress --save-dev
npm install cypress-xpath
npm install --save-dev allure-commandline
npm install --save-dev allure-cypress
```

To run the tcs

To run all the tcs, type in the terminal
`npx cypress run`

To execute the report, type in the terminal
`npx allure serve allure-results`

Note:

If you have the issue of no version of cypress, please type in the terminal:
`npx cypress install --force`

If you have the issue of the version of npm, please type in the terminal
`npm --force install`

Option of the IDE to use: VS code
